This systematic approach helps companies assess the relative worth of different jobs based on specific criteria, ensuring fair and equitable pay structures. In this article, we will explore the key components of the hay job evaluation guide chart, how it works, and tips for implementing it effectively within your organization.

What Is the Hay Job Evaluation Guide Chart?

The Hay Job Evaluation Guide Chart is a structured framework developed by the Hay Group (now part of Korn Ferry) that provides a method for objectively evaluating and comparing jobs across an organization. It focuses on three core factors: Know-How, Problem Solving, and Accountability. These factors are broken down into sub-factors and degrees, which help assign a numerical value or point score to each job. This process results in a clear hierarchy of roles, facilitating equitable pay and career development pathways.

Core Components of the Hay Job Evaluation Guide Chart

Understanding the core components of the hay job evaluation guide chart is essential for accurate job assessment. Let's examine each of these factors in detail.

1. Know-How

Know-How refers to the knowledge, skills, experience, and qualifications required to perform a job effectively. It encompasses both technical abilities and broader competencies.

1. **Technical Know-How:** The specialized knowledge needed to perform specific tasks, such as engineering, software development, or accounting.
2. **Management Know-How:** Skills related to planning, organizing, leading, and controlling resources.
3. **People Know-How:** Interpersonal skills, communication, and ability to work with others.

The degrees of Know-How are rated on a scale, typically from simple to complex, based on the level of expertise and experience required.

2. Problem Solving

Problem Solving measures the complexity and handleability of issues a jobholder must address.

1. **Routine Problems:** Tasks that involve standard procedures and predictable outcomes.
2. **Complex Problems:** Issues requiring analysis, judgment, and decision-making beyond routine procedures.
3. **Strategic Problems:** Challenges involving planning, forecasting, and long-

term thinking.

The evaluation considers the degree of judgment, creativity, and independence needed to resolve problems.

3. Accountability

Accountability assesses the extent of responsibility a role has over resources, decisions, and outcomes.

1. **Financial Responsibility:** Responsibility for budgets, costs, or financial outcomes.
2. **Work Impact:** The degree to which the role impacts organizational goals or customer satisfaction.
3. **People Responsibility:** Supervisory or managerial responsibilities for others' work or well-being.

Higher accountability levels correlate with greater decision-making authority and organizational impact.

The Philosophy and Purpose of Hay Job Evaluation

Developed by the Hay Group, now part of Korn Ferry, the Hay job evaluation method is a point-based system designed to assess the relative worth of jobs within an organization. Its core philosophy revolves around the notion that jobs can be objectively evaluated based on their demands, responsibilities, and required skills, rather than subjective perceptions or organizational hierarchy. The primary goals include: - Establishing internal equity - Providing a basis for fair remuneration - Facilitating organizational structure alignment - Supporting career development and succession planning

The Role of the Hay Guide Chart

The Hay Guide Chart acts as a visual and analytical tool that guides evaluators through a systematic process of analyzing and scoring jobs. It helps quantify qualitative aspects of a role into measurable points, ensuring consistency and transparency across evaluations.

Structure of the Hay Job Evaluation Guide Chart

The Hay guide chart is essentially a structured matrix that segments job evaluation into three core factors, each with defined degrees of complexity and

responsibility. These factors form the backbone of the point system.

The Three Core Factors

1. Know-How 2. Problem Solving 3. Accountability Each of these factors is further broken down into sub-elements, with specific descriptions and scoring criteria.

Evaluation Criteria: - Frequency and complexity of problems encountered. - Autonomy in solving issues. - Impact of decisions on

the organization. Scoring: Jobs with complex, non-routine problems and high judgment levels score higher points, indicating greater problem-solving demands.

Step 2: Factor Evaluation Assess each core factor (Know-How, Problem Solving, Accountability) based on the detailed descriptions and criteria. Step 3: Assign Points Using the guide chart, assign points to each factor according to the level of complexity or responsibility. Step 4: Total Points Sum the points from all three factors to derive the total job score. Step 5: Job Classification Compare the total points against established benchmarks or pay grades to determine the job's relative value within the organization.
