Ancient Japan and Early Influences

The roots of Japanese cuisine can be traced back thousands of years. During the Jomon period (14,000–300 BCE), early inhabitants relied heavily on hunting, fishing, and gathering wild plants. Archaeological evidence suggests they consumed a variety of seafood, wild vegetables, and grains like millet and barley. In the Yayoi period (300 BCE–300 CE), rice cultivation was introduced from the Asian mainland, which became a cornerstone of Japanese food culture. The development of rice paddies not only changed agriculture but also shaped social structures and rituals.

Heian Period (794–1185): Refinement and Court Cuisine
