1. Explain the concept of the marketing mix and its components.

Answer:

The marketing mix, often called the 4Ps (Product, Price, Place, Promotion), is a foundational framework that guides marketers in designing and executing effective marketing strategies.

1. Product: The goods or services offered to meet customer needs. This includes features, quality, branding, and packaging.

1. Price: The amount customers pay for the product. Pricing strategies must consider costs, competition, perceived value, and demand elasticity.

1. Place: Distribution channels through which the product reaches customers. This encompasses logistics, location, and accessibility.

1. Promotion: Activities that communicate the product's benefits to the target audience, including advertising, sales promotion, public relations, and personal selling.

1. Describe the process of market segmentation and its importance.

Answer:

1. Penetration Pricing: Setting low prices to enter a competitive market and gain market share quickly, then gradually increasing prices.

1. Skimming Pricing: Launching with high prices to maximize margins from early adopters, then lowering prices to attract more price-sensitive customers.

1. Psychological Pricing: Using pricing that influences perception, such as $9.99 instead of $10.00.
