The roots of forensic science can be traced back to ancient civilizations such as Egypt, Greece, and China. Early societies recognized the importance of physical evidence in solving disputes and crimes. - Ancient Egypt: Records from around 3000 BCE mention the use of forensic methods in determining the cause of death and identifying criminals. The Edwin Smith Papyrus, an ancient Egyptian medical text, includes descriptions that resemble forensic procedures. - Ancient Greece: Philosophers like Aristotle discussed methods of identifying perpetrators based on physical

evidence and eyewitness testimony. - Ancient China: During the Han Dynasty (206 BCE – 220 CE), officials used techniques such as examining corpses for signs of poisoning and analyzing bloodstains to aid in criminal investigations.

Medieval and Renaissance Periods

While systematic forensic methods were limited during medieval times, some notable developments occurred: - Magical and superstitious practices often overshadowed scientific approaches. - Early forensic techniques such as fingerprinting and ballistics began to emerge in the Renaissance, setting the stage for future advancements.

Foundational Developments in Modern Forensic Science

19th Century: Birth of Scientific Forensics

The 19th century marked a turning point with the application of scientific principles to criminal investigations. - Alphonse Bertillon (1853–1914): Developed the first systematic method of identifying individuals through anthropometry, measuring physical features like skull size and limb length. This "Bertillonage" system was used widely until fingerprinting became more popular. - Karl Landsteiner (1868–1943): Discovered blood groups in 1901, revolutionizing crime scene analysis by enabling investigators to classify blood evidence. - Sir Francis Galton (1822–1911): Pioneered the study of

fingerprints, establishing their uniqueness and reliability as identification tools. His work laid the groundwork for fingerprinting as a forensic technique.

Early 20th Century: Formalization and Institutionalization
