Having the correct codes ensures seamless control, reduces clutter, and enhances the overall entertainment experience. Whether you've purchased a new ONN remote or are trying to program an existing one, understanding how to find and use these codes is crucial. In this comprehensive guide, we'll explore the various aspects of ONN universal remote codes, including how to program your remote, the list of common codes, troubleshooting tips, and additional resources to help you get the most out of your remote control.

What Are ONN Universal Remote Codes?

Universal remote codes are unique sequences of numbers that correspond to different brands and models of electronic devices. When programmed into the remote, these codes enable the remote to communicate with and control compatible devices. ONN, a popular brand known for affordable electronics and accessories, offers a range of universal remote controls

compatible with many major brands. Because ONN remotes are designed to work with multiple devices, they utilize a set of predefined codes. These codes are typically found in the user manual or can be retrieved through automatic search features built into the remote.

Common ONN Universal Remote Code Types

There are generally two types of codes used with ONN universal remotes:

1. Manufacturer-Specific Codes

These codes are specific to the brand of the device you want to control, such as Samsung, LG, Sony, Vizio, etc. Using the correct brand code ensures optimal compatibility.

2. Device-Type Codes

Some remote controls also support codes based on device type, such as TV, DVD, Blu-ray, or soundbar, which may encompass multiple brands under a single code.

How to Program Your ONN Universal Remote

Programming your ONN universal remote involves entering the correct code for your device or using an automatic search method. Below are detailed steps for both methods.

Method 1: Manual Code Entry

Enter the code using the remote’s number pad. 6. Wait for the remote to acknowledge the code (usually a brief blink of the indicator light). 7. Test the device control functions (power, volume, input) to verify correct programming. 8. Repeat the process if the device does not respond.

Method 2: Automatic Code Search

1. Turn on the device you want to control. 2. Press and hold the 'Setup' button until the indicator light remains on. 3. Press the device button (e.g., TV). 4. Press and hold the 'Power' button. 5.
