3. **Third Law:** For every action, there is an equal and opposite reaction.

Understanding these laws helps students analyze real-life scenarios, such as vehicle motion, sports dynamics, and more.

## 2. Gravitation

Gravitation describes the attractive force between any two masses in the universe. It explains phenomena such as planetary motion, tides, and weight.

1. **Universal Law of Gravitation:** The force between two

masses is proportional to the product of their masses and inversely proportional to the square of the distance between them ($F = G m_1 m_2 / r^2$).
